Open Burning Permit

- 1 Application Creation
- 2 Review
- 3 Pay Fees
- 4 Record Issuance

Step 1: Application Creation > Basic Information

Terms and Definitions

"Residential burning" means open burning of vegetative materials conducted by or for the occupants of residential dwellings, but does not include burning household waste or prohibited material.

"Construction burning" means burning wood or vegetative material from land clearing, site preparation, or fabrication, erection, installation, demolition, or modification of any buildings or other land improvements, but does not include burning household waste or prohibited material.

"Agricultural burning" means burning of vegetative materials related to the production and harvesting of crops and raising of animals for the purpose of marketing for profit, or providing a livelihood, but not including the burning of household waste or prohibited materials. Burning may be conducted in fields, piles, ditch banks, fence rows, or canal laterals for purposes such as weed control, disease and pest prevention, or site preparation.

"Open outdoor fire or open burning" means the combustion of material of any type, outdoors and in the open, where the products of combustion are not directed through a flue. Open outdoor fires include agricultural, residential, prescribed, and construction burning, and fires using air curtain destructors.

"Household waste" means any solid waste including garbage, rubbish, and sanitary waste from a septic tank that is generated from households including single and multiple family residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas, but does not include construction debris, landscaping rubble, demolition debris or prohibited materials.

"Prohibited materials" means nonpaper garbage from the processing, storage, service, or consumption of food; chemically treated wood; lead-painted wood; linoleum flooring, and composite counter-tops; tires; explosives or ammunition; oleanders; asphalt shingles; tar paper; plastic and rubber products, including bottles for household chemicals; plastic grocery and retail bags; waste petroleum products, such as waste crankcase oil, transmission oil, and oil filters; transformer oils; asbestos; batteries; anti-freeze; aerosol spray cans; electrical wire insulation; thermal insulation; polyester products; hazardous waste products such as paints, pesticides, cleaners and solvents, stains and varnishes, and other flammable liquids; plastic pesticide bags and containers; and hazardous material containers including those that contained lead, cadmium, mercury, or arsenic compounds.

"Prescribed burning" means the controlled application of fire to wildland fuels that are in either a natural or modified state, under certain burn and smoke management prescription conditions that have been specified by the land manager in charge of or assisting the burn, to attain planned resource management objectives. Prescribed burning does not include a fire set or permitted by a public officer to provide instruction in fire fighting methods, or construction or residential burning.

"Air curtain destructor" means an incinerator device designed and used to secure, by means of a fan-generated air curtain, controlled combustion of only wood waste and slash materials in an earthen trench or refractory-lined pit or bin.

"Dangerous material" means any substance or combination of substances that is capable of causing bodily harm or property loss unless neutralized, consumed, or otherwise disposed of in a controlled and safe manner.

"Approved waste burner" means an incinerator constructed of fire resistant material with a cover or screen that is closed when in use, and has openings in the sides or top no greater than one inch in diameter.

Open Burning Permit

- 1 Application Creation
- 2 Review
- 3 Pay Fees
- 4 Record Issuance

Step 1 : Application Creation > Certification

Terms of Usage

The following conditions apply to the open burn permit:

- Burn only vegetative materials (NOT oleander) for Residential, Agricultural, and Prescribed burning;
- Burn only non-chemically treated and non lead-painted wood for Construction and Air Curtain Destructor burning;
- Conduct burns no earlier than one hour after sunrise and extinguish the fire no later than two hours after sunset;
- Conduct open burning only during conditions that: prevent dispersion of smoke into populated areas; prevent visibility impairment on traveled roads or at airports that result in a safety hazard; do not create a public nuisance or adversely affect public safety; do not cause an adverse impact to visibility in a Class I area; and do not cause uncontrollable spreading of the fire;
- Use one of the following emission reduction techniques: piling; collecting in pit; reducing burn area; consolidating materials; reduce smoldering; pre-drying material;
- Notify the local fire-fighting agency or private fire protection service provider, or the state forester if neither exists, prior to conducting the open burn;
- Start each open outdoor fire using items that do not cause the production of black smoke;
- Attend the fire at all times until it is completely extinguished;
- Provide fire extinguishing equipment on-site during open burning;
- Ensure that the burning pit, burning pile, or approved waste burner be at least 50 feet from any structure;
- Not conduct open burning when an air stagnation advisory, as issued by the National Weather Service, is in effect in the area of the burn or during periods when smoke can be expected to accumulate to the extent that it will significantly impair visibility in Class I areas;
- Not conduct open burning when any stage air pollution episode is declared by the Arizona Department of Environmental Quality or Pima County Department of Environmental Quality;
- Have a copy of the Open Burning Permit on-site during open burning and;
- Provide an Open Burning Report to the Pima County
