Note: Due to the topography, geomorphology, and/or natural resources present, land may contain Flood Control Resource Areas. These Areas include FEMA Special Flood Hazard Areas, known local-identified floodplains, Pima County Regulated Riparian Habitats, and other natural watercourses. Development in these areas should be avoided by transferring allowable densities to non-affected portions of the development.

The Pima County Regional Flood Control District maintains and is responsible for interpreting the content of the area identified as Flood Control Resource Areas on this map. For accurate delineation of boundaries and flood hazards associated with any specific location, please contact the District.
