RE: Valencia Road Widening -- Wade Road to State Route 86 (SR86)

Ms. Uhr,

Please find attached renewal applications and supporting documents for two previously granted right-of-ways; A-18241 and A-18432. Based on our discussions of August 16, there are now three applications being submitted due to one segment of the original A-18432 grant being outside of and not impacted by the Valencia Road widening project for which an A-18432-01 numbering sequence was suggested. More specifically, the attachments include the following and are also found on the enclosed cd.

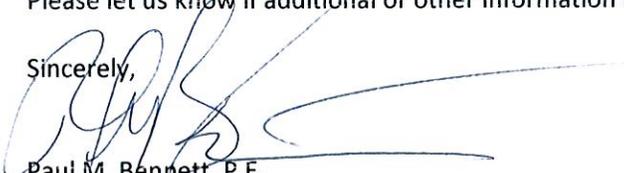

The documents for renewal of the A-18241 right-of-way (curve at intersection of SR86) renewal include a completed application (Form 299) and a Plan of Development (POD) associated with that segment. The appendix documents for the POD include a copy of the original right-of way document, a copy of the Project Plan Set, a Biological Evaluation for the entire corridor as was discussed, a Cultural Review for the entire corridor, and Visual Analysis – Corridor Pictures.

The documents for renewal of the A-18432 right-of-way (straight segment within Valencia Road project) include a completed application (Form 299) and a POD associated with that segment. The appendix documents for the POD include a copy of the original right-of way document, a copy of the Project Plan Set, a Biological Evaluation for the entire corridor, a Cultural Review for the entire corridor, and Visual Analysis – Corridor Pictures.

The last renewal (separate segment originally covered under A-18432), is for a segment that is outside of the Valencia Road project. The submission only contains the renewal application (Form 299) and a copy of the original right-of-way.

Please let us know if additional or other information is needed as part of your review effort.

Sincerely,

Paul M. Bennett, P.E.
Project Manager
