with the Regional Transportation Authority regional transportation plan. The new roadway will be divided by a raised median, with two travel lanes in each direction, turning lanes, bicycle lanes, and pedestrian facilities.

The purpose of the intensive pedestrian (Class III) cultural resources survey reported here was to identify cultural resources within the area of potential effects (APE), assess the eligibility of identified resources for listing in the National Register of Historic Places (NRHP) in accordance with 36 Code of Federal Regulations 60.4, and make a recommendation concerning the potential effect of the proposed undertaking on resources listed in or eligible for listing in the NRHP.

**6. PROJECT AREA/AREA OF POTENTIAL EFFECTS:** The Valencia Road widening project will be restricted largely to the existing Valencia Road right-of-way (ROW) between Wade Road on the east and Ajo Highway on the west. The length of this segment of the ROW is 3.25 miles (5.23 km); the width varies from 150 to 200 feet (46 to 61 m). The APE also includes a portion of the existing ROW of a minor cross street (Vahalla Road) and small areas along the Valencia Road ROW where ancillary drainage features will be constructed (see Figure 19b).

**9. ENVIRONMENTAL CONTEXTS**

**9a. Landform:** Bajada (coalescing alluvial fan)

**9b. Elevation:** 2,440–2,480 feet above mean sea level

**9c. Surrounding Topographic Features:** The project area is about 4 miles southwest of the Tucson Mountains.

**9d. Nearest Drainage:** The Santa Cruz River runs south–north about 7 miles east of the project area. Several small seasonal washes trend southeast–northwest through the project area, part of a system of washes that drain eventually into Brawley Wash about 9 miles west of the project area.

**9e. Local Geology:** Mixed-fan alluvium (National Resources Conservation Service [NRCS] 2013)

**9f. Vegetation:** Sonoran Desert Region, Arizona Upland Subdivision (Turner and Brown 1994); no intact native vegetation is found in the survey area.

**9g. Soils/Deposition:** Soils range from well-drained loam to well-drained fine sandy loam of the Tubac, Mohave, and Yaqui complexes that form on floodplains and fan terraces (NRCS 2013).

**9h. Buried Deposits:** Not likely

**9i. Justification:** The area has been heavily disturbed through construction of Valencia Road.

**10. BUILD ENVIRONMENT:** Valencia Road and ancillary drainage features

**18. COMMENTS:**

EcoPlan conducted a Class III cultural resources survey of the APE in anticipation of a road-widening project along approximately 2.75 miles of Valencia Road. The APE includes the existing Valencia Road ROW between Wade Road and Ajo Highway, plus a portion of the existing ROW of a minor cross street (Vahalla Road) and small areas along the Valencia Road ROW where ancillary drainage features will be constructed. EcoPlan archaeologists Christopher Taylor and Ted Eldridge conducted the survey on July 13, 2016, and found a single cultural resource in the APE—a GLO survey marker placed in 1916. EcoPlan recommends that the marker, designated Isolated Occurrence (IO) 1, be considered ineligible for listing in the NRHP.

Only one cultural resource was previously recorded within the APE—archaeological site AZ AA:16:458 (ASM), the remains of a historic-period farmstead. The site was found by SWCA Environmental Consultants, Inc., in a survey for a proposed housing development (Sayre 2002) and was determined eligible for listing in the NRHP by the Arizona SHPO in 2003 (AZSITE 2016). Most of the site was recorded south of the Valencia Road ROW, but a

**STATE HISTORIC PRESERVATION OFFICE  
SURVEY REPORT SUMMARY FORM**

small portion may have extended into the current APE (the plot of the site in AZSITE and the original site record is ambiguous). In the EcoPlan survey, no trace of the site could be found in the APE. Some of the site's features are visible just south of the APE, but the EcoPlan survey did not extend beyond the APE.

Based on the results of the Class III survey, EcoPlan recommends a finding of no historic properties affected for the proposed road-widening project.

**21. DISCOVERY CLAUSE**

---

In the event that previously unreported cultural resources are encountered during ground-disturbing activities, all work must immediately cease within 30 m (100 feet) until a qualified archaeologist has documented the discovery and evaluated its eligibility for the Arizona or National Register of Historic Places in consultation with the lead agency, SHPO, and the tribes, as appropriate. Work must not resume in this area without approval of the lead agency.

If human remains are encountered during ground-disturbing activities, all work must immediately cease within 30 m (100 feet) of the discovery, and the area must be secured. The ASM, lead agency, SHPO, and appropriate tribes must be notified of the discovery. All discoveries would be treated in accordance with Native American Graves Protection and Repatriation Act (Public Law 101-601; 25 U.S.C. 3001-3013) or Arizona Revised Statutes (A.R.S. § 41-844 and A.R.S. § 41-865), as appropriate, and work must not resume in this area without authorization from ASM and the lead agency.
