Re: **COVID-19 Cases by Week**

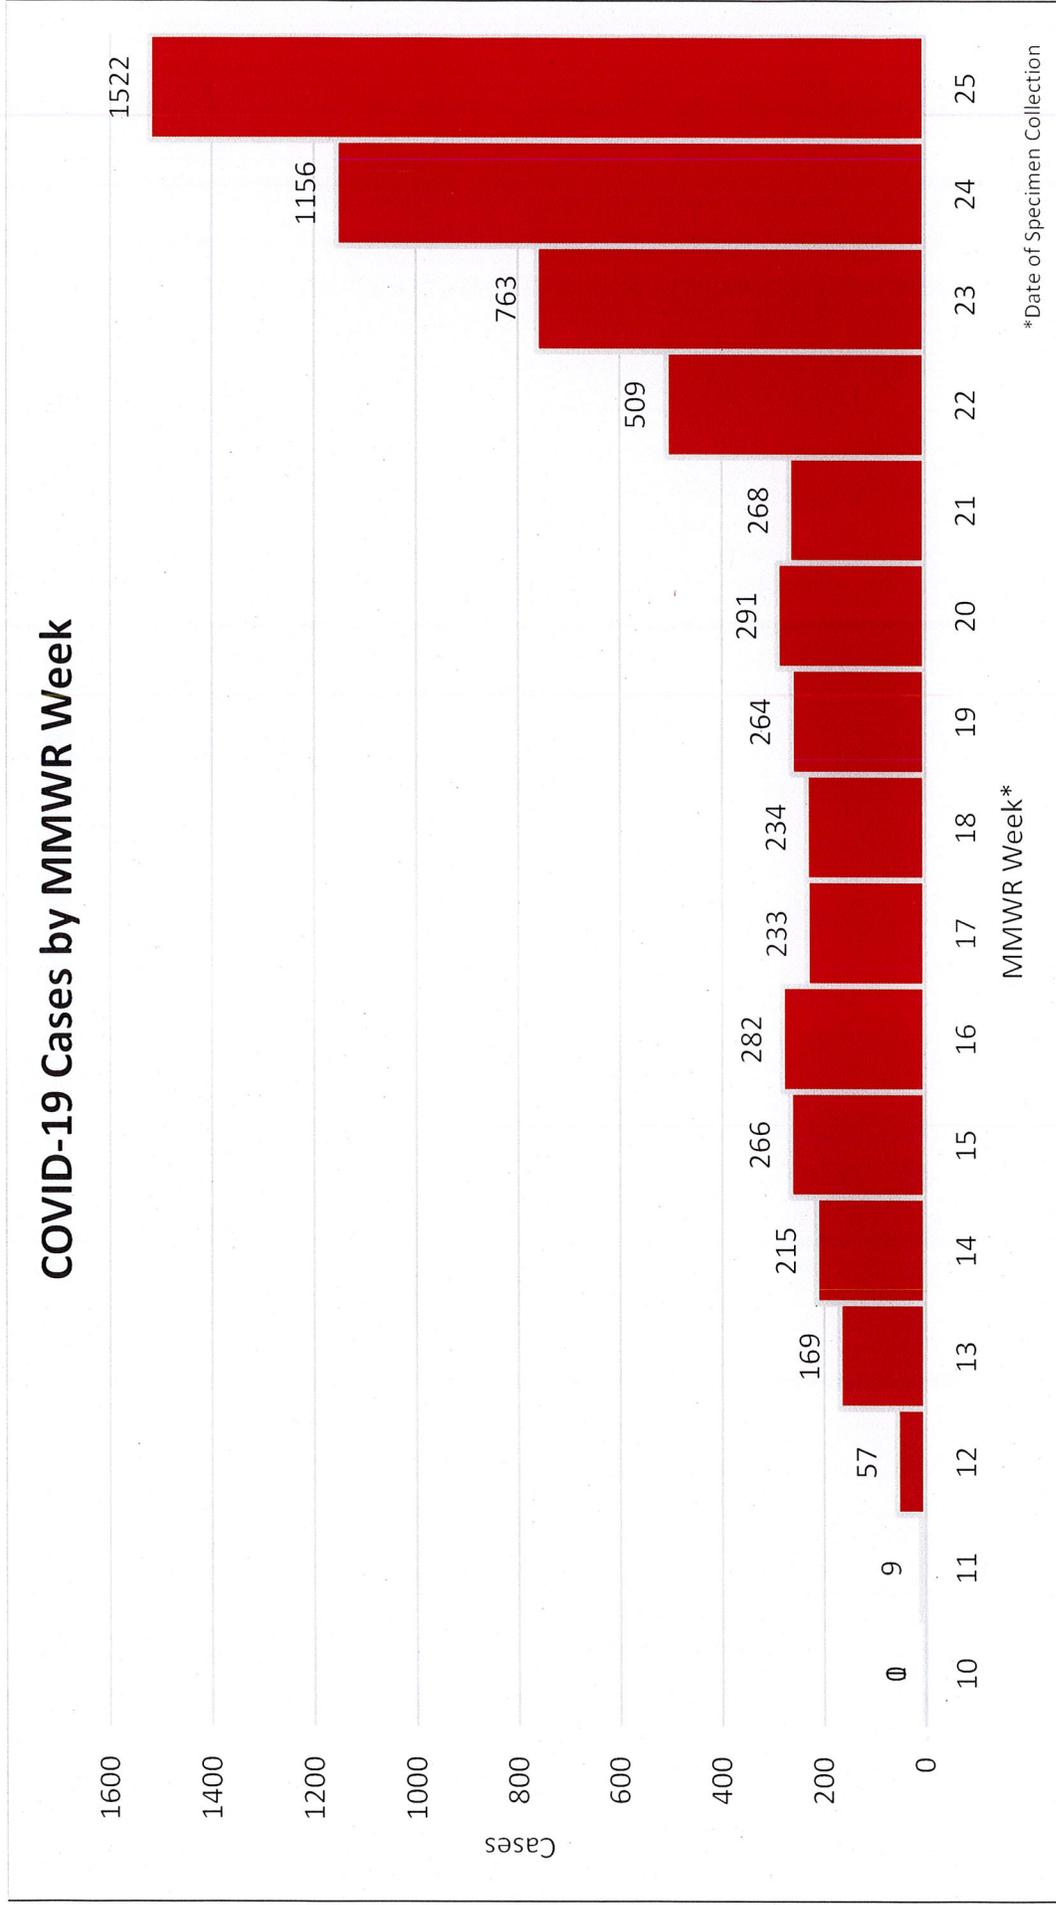

Attached, please see the most recent graph depicting COVID-19 cases by week. For the week ending June 20, 2020, there were 1,522 COVID-19 cases reported. So far, this week has reported 1,233 cases, based on the daily case reports of the Arizona Department of Health Services. There are still two additional days to add to this week's total; therefore, it is likely the total cases for the week ending June 27 will exceed the week that ended June 20.
