

MEMORANDUM

Date: May 28, 2020

To: The Honorable Chairman and Members
Pima County Board of Supervisors

From: C.H. Huckelberry
County Administrator

A handwritten signature in black ink, appearing to read "CHH", is written over the printed name "C.H. Huckelberry".

Re: **Fiscal Year 2021 Pavement Repair and Preservation Program**

As the Board knows, I have proposed that with Final Budget Adoption the Pavement Repair Program be substantially increased from the previous year totaling approximately \$56 million. This is a near doubling of the amount of work performed last fiscal year.

The attached May 27, 2020 memorandum from the Transportation Director provides the Board a view of this program. If approved at Final Budget Adoption the amount of roadways improved, arterial and collector as well as local by district, and the sum of dollars that would be expended are shown on the first page of the communication. The attachments to this memorandum provide a list of roads that have been proposed for rehabilitation, both arterial and collector, as well as local roads. The attachments also list those projects by District with their estimated costs.

Please let me know if you have any issues or concerns with the proposal in the projects that are proposed for rehabilitation and construction. Because of the volume of work that will need to be completed next fiscal year this program will essentially begin immediately after the Final Budget Adoption.

FROM: Ana M. Olivares, P.E.
Director

SUBJECT: Fiscal Year 2021 Pavement Repair and Preservation Program

The Department has prepared the road lists for the road repair (mill and fill) portion of fiscal year 2021 Pavement Repair and Preservation Program. This portion of the program totals approximately \$53 million. The road preservation (surface treatments) list is still being finalized and will be shared as soon as it is complete. The preservation portion totals approximately \$2.5 million and is only on Arterial/Collector roads.

This table below summarizes the road repair totals per Board of Supervisor (BOS) District.

| District: | 1 | | 2 | | 3 | | 4 | | 5 | | Total Sum of Miles | Total Sum of Cost |
|---------------------------|--------------|----------------------|-------------|-------------------|--------------|----------------------|--------------|----------------------|--------------|---------------------|--------------------|----------------------|
| Functional Classification | Miles | Cost | Miles | Cost | Miles | Cost | Miles | Cost | Miles | Cost | | |
| Arterial/Collector | 12.48 | \$ 7,285,636 | 0.20 | \$ 90,767 | 22.20 | \$ 4,841,010 | 9.20 | \$ 2,759,522 | 1.56 | \$ 497,626 | 45.65 | \$ 15,474,560 |
| Local | 51.76 | \$ 15,951,753 | 2.12 | \$ 567,256 | 37.34 | \$ 8,890,258 | 22.49 | \$ 7,985,145 | 13.40 | \$ 4,276,797 | 127.10 | \$ 37,671,209 |
| Grand Total | 64.23 | \$ 23,237,389 | 2.32 | \$ 658,022 | 59.54 | \$ 13,731,267 | 31.69 | \$ 10,744,667 | 14.97 | \$ 4,774,423 | 172.75 | \$ 53,145,769 |

The road repair lists have been developed for both Arterial/Collector Roads and for Local Roads. The roads were selected using the Pima County Transportation Advisory Committee (PTAC) adopted criteria. For Local Roads, the criteria was to select roads with the worst Pavement Condition Index (PCI) rating and adjacent roads. The Arterial/Collector Roads were selected using the Street Saver Pavement Management Program. These lists have been published on Transportation’s website, Roadway Maintenance, 10-Year Plan. The published Local Road list is sorted by PCI rating and the published Arterial/Collector Road list is sorted alphabetically. These lists on the website do not include estimated costs.

For your information, we have also prepared the lists by BOS Districts with estimated costs. The cost per mile varies from District to District for a couple of reasons. One, the width of Arterial/Collector roads varies throughout unincorporated Pima County. For example, an arterial like Sandario Road in District 3 has two lanes with no shoulders compared to La Cañada Drive, an arterial in District 1, which has four lanes with shoulders. The tables in Attachments 3 and 4 have the average width shown for each roadway; however, now that we have the geometric data of the roadways in the system, we do not use average widths to calculate the square yard area for cost estimating. The system uses the polygon of the roadway segment to calculate the area.

Second, the cost for subdivisions with curb ramps is higher than the subdivisions without curb ramps and those subdivisions will have a higher cost per mile.

C. H. Huckelberry

ATTACHMENT I

Fiscal Year 20-21 Local Road Repair List Introduction

Pima County has a 10-year plan to repair all currently failed and poor roads to achieve an average network Pavement Condition Index (PCI) of 80 by 2030.

Pavement Condition Index (PCI) is determined by an objective analysis that uses ASTM D6433-18 Standard Practice for Roads and Parking Lots Pavement Condition Index Surveys. PCI ranges from zero to 100 with the latter representing new pavement.

Road Selection Process

In 2019, the Pima County Transportation Advisory Committee (PCTAC) conducted a public survey regarding how to allocate resources for local roads. The overwhelming response was to repair worst roads first. A full discussion on this topic, including budget allocations is available on the [PCTAC](#) web page. As such, the PCTAC adopted the following process for selecting local roads for Fiscal Year 2021:

- Ranking was determined by sorting the list of 1,300 miles of local road segments from worst to best by Pavement Condition Index (PCI)
- Roads of the same PCI were additionally ranked by:
 1. Presence of school crosswalks
 2. Lack of sidewalks
 3. Lot density

Roads in a subdivision will typically have different PCI ratings and because it is not practicable or cost effective to repair one road in a subdivision and then move to another subdivision or local road, the PCTAC provided the following criteria for developing the list that would maximize work with the available repair budget:

1. Select worst ranked road segment from list (the “trigger” road), then select all road segments in same subdivision or contiguous to the trigger road
2. Once all qualifying road segments have been selected, select the next worst road on ranked list
3. When the remaining budget is too small to select the next qualifying worst road on the ranked list and associated subdivision/contiguous segments, skip that worst road and select the next worse road on list

Road Repair List Organization

The road repair list which follows has the “trigger road” (lowest PCI roadway) for each subdivision highlighted in yellow from lowest to highest PCI order. Roadways which are not related to a subdivision are listed as “Local Road No Subdivision”. Within the subdivisions, all roads associated with the subdivision are listed in PCI order.

Fiscal Year 20-21 Arterial and Collector Road Repair List Introduction

Pima County has a 10-year plan to repair all currently failed and poor roads to achieve an average network Pavement Condition Index (PCI) of 80 by 2030.

Pavement Condition Index (PCI) is determined by an objective analysis that uses ASTM D6433-18 Standard Practice for Roads and Parking Lots Pavement Condition Index Surveys. PCI ranges from zero to 100 with the latter representing new pavement.

Road Selection Process

The Pima County Transportation Advisory Committee (PCTAC) in concert with Pima County staff decided that it was in the best interest of preserving the arterial and collector network to allocate resources based on modeling maximum return on investment. A full discussion on this topic, including budget allocations is available on the [PCTAC](#) web page.

Road Repair List Organization

The road repair list which follows has the arterial/collector roads listed alphabetically.

Ana M. Olivares, P.E., Director

201 N.Stone Avenue, 4th Floor, Tucson, Arizona 85701-1207 • Phone: 520-724-6410 • Fax: 520-724-6439
