MEMORANDUM

Date: June 8, 2021

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: C.H. Huckelberry
County Administrator

Re: Representation of COVID-19 Cases by Location within Pima County

The latest COVID-19 test collection dates between May 30, 2021 and June 5, 2021 indicate that approximately 160 COVID-19 cases occurred as plotted in the attached map. Census tracts where 75 percent of the population received at least one dose of the COVID-19 vaccine are shown as well as those census tracts where 40 percent or less of the population received at least one dose of the COVID-19 vaccine are also shown.

There is a strong correlation between those census tracts with a substantially lesser vaccination rate than those census tracts where the vaccination rate is 75 percent or greater. This data confirms that vaccination is an effective method of preventing the spread of COVID-19.
