Re: **COVID-19 Positive Cases**

Weekly reports continue to show a reduction in COVID-19 positive cases. The period between May 16 and May 22, 2021 shows 218 cases while the previous week documented 259 COVID-19 cases.

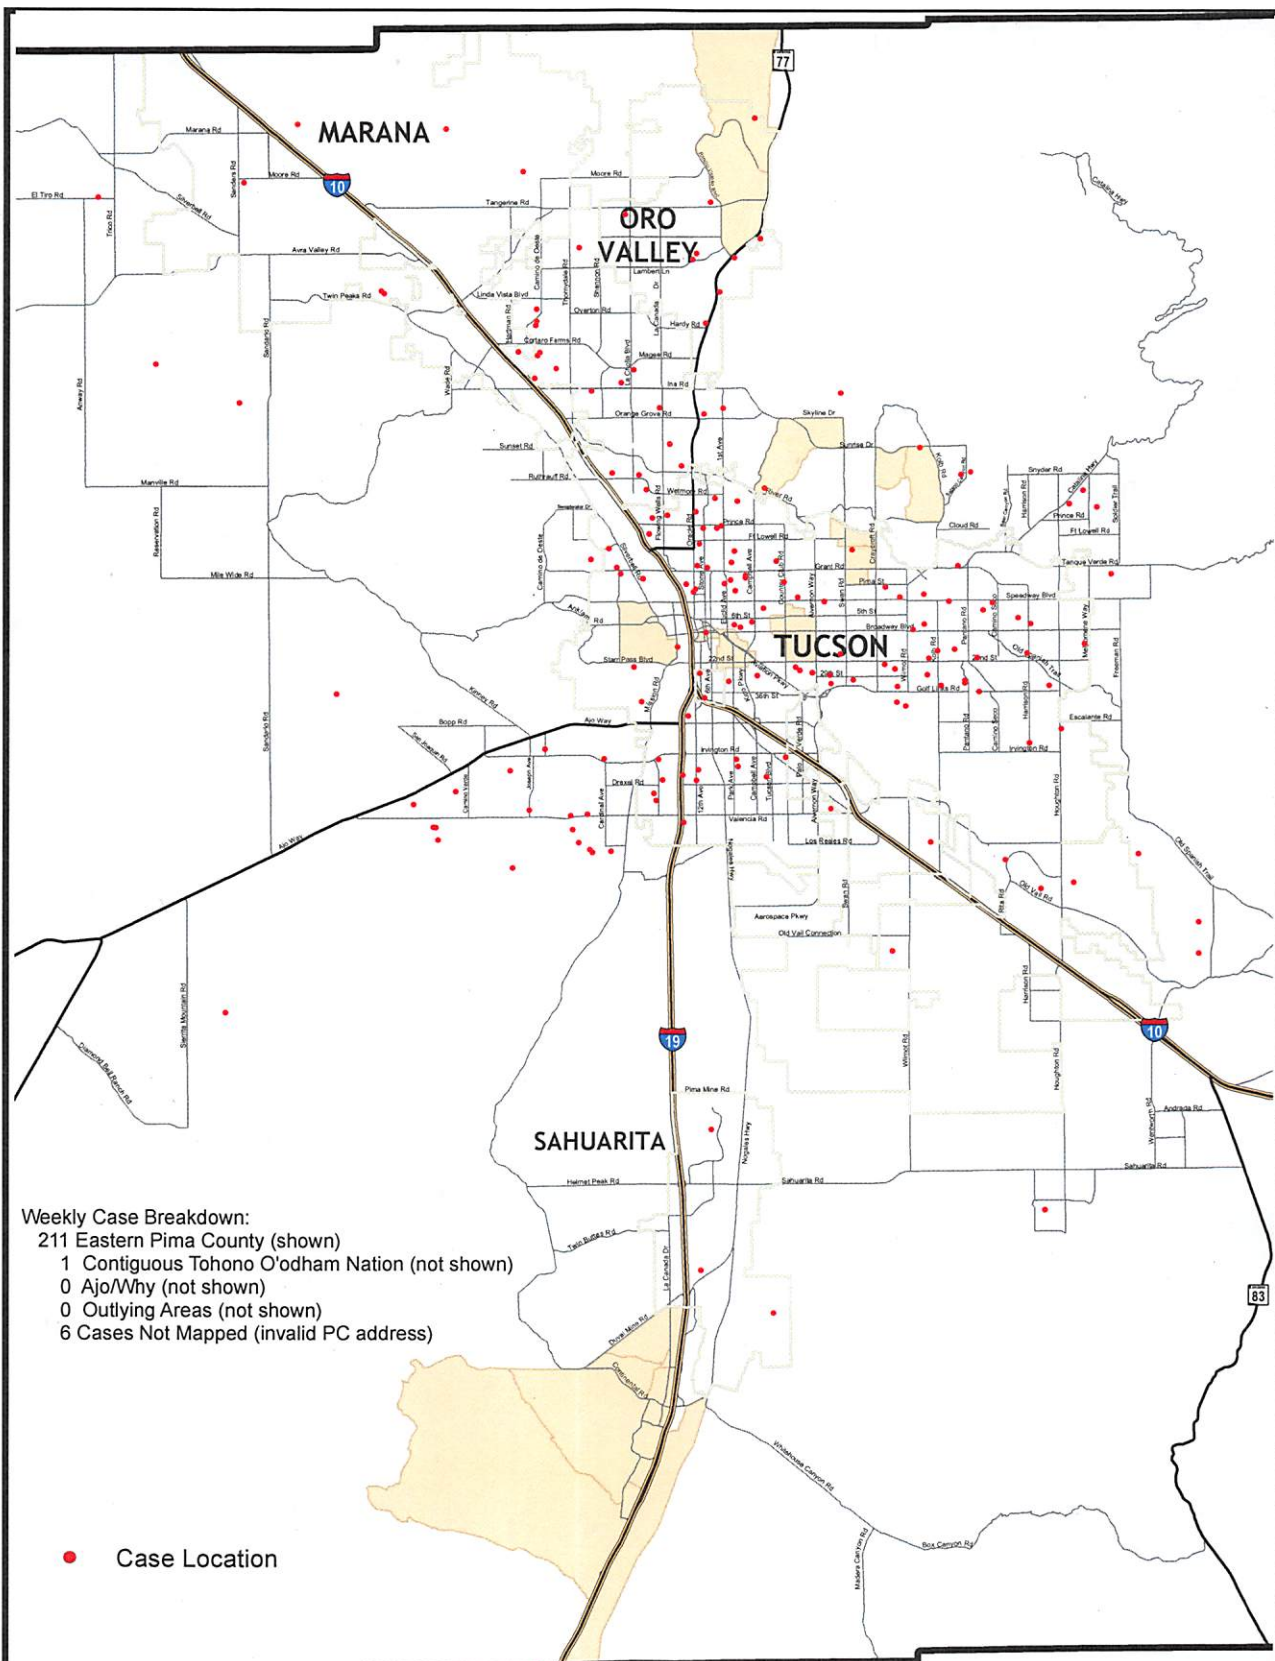

In addition, we now see more census tracts meeting the threshold of where the population has at least one dose of the COVID-19 vaccine. Also, note that in most census tracts that meet this standard, there are very few, if any COVID-19 infections. This demonstrates the efficacy of the vaccine.

We continue to encourage everyone who is eligible to receive one of the three Emergency Use Authorized vaccines to do so.
