# MEMORANDUM

---

Date: September 20, 2021

To: The Honorable Chair and Members  
Pima County Board of Supervisors

From: C.H. Huckelberry  
County Administrator 

Re: **Survey of Unvaccinated Employees**

By way of direction to the County Administrator the Board of Supervisors during its last meeting asked staff to conduct a survey of unvaccinated employees to inform the policy discussion regarding incentives and disincentives.

To that end an electronic survey link was sent to 1,878 employees with current valid email contact information who had not requested an "I'm vaccinated" badge. The survey was initiated on September 14 and employees were given until the September 19 to respond.

In total, 371 responses were received. Among respondents, 36 percent reported having received at least a single dose of vaccine, while the remaining 64 percent confirmed their unvaccinated status.

Looking only at the unvaccinated subset of employees (Question 3), less than 5 percent reported they planned to get vaccinated, 82 percent reported they would probably not or definitely not be vaccinated, and the remaining 13 percent were unsure.

Unvaccinated employees were asked about their intent to vaccinate children 12 to 17 years of age in the household (Question 6). Approximately 76 percent said they would definitely or probably not get their child vaccinated, compared to 2 percent who noted they would definitely or probably get their child vaccinated. Almost 8 percent were unsure, and 18 percent did not know the plan was for vaccination in children in their household.

Employees were presented with a list of reasons why they were not vaccinated (Question 4), and asked to select *all* the items that apply. The results are summarized in the table below.

Response options	Percent	Count
I am concerned about possible side effects of vaccine	74.59%	135
I don't know if a vaccine will protect me	33.15%	60
I don't believe I need a vaccine	43.09%	78
My doctor has not recommended it	25.41%	46
I plan to wait and see if it is safe	36.46%	66
I am concerned about the cost of vaccine	1.10%	2
I don't trust the vaccine	47.51%	86

I don't trust the government	38.67%	70
I don't think it's a big threat	25.97%	47
It's hard for me to get a vaccine	1.66%	3
I believe one dose is enough	1.66%	3
I experienced side effects	1.66%	3
I already had COVID	27.07%	49
Other	45.86%	83

Nearly 43 percent (or 83 respondents) selected "other". Free text comments generally revealed a distrust or deeply held perceptions not likely to be amenable to education. Religious objections were cited by 7 respondents and medical concerns identified by 18.

Respondents were also asked to identify all the barriers they experienced to getting vaccinated (Question 5). Notably, the vast majority of respondents, 69 percent, reported absolutely no barrier to vaccination. The category "other" was selected by 26 percent of respondents; 22 percent of 47 free text responses could be characterized as "none" or "not applicable". The remaining free text responses did not identify any barriers and instead identified statements of values or beliefs.

Response options	Percent	Count
Not having time	1.66%	3
Not getting time off work for vaccine or recovery from side effects	2.21%	4
Vaccine website or phone line crashing	0.55%	1
No available appointments	0.55%	1
Not knowing how/where to find vaccine	1.10%	2
Information not available in my language	0.55%	1
Limited access to internet or phone	0.55%	1
Concern about out-of-pocket costs	0.55%	1
No vaccine clinics close by	0.00%	0
Difficulty with travel/transportation	0.55%	1
Lack of childcare	1.66%	3
No barriers	68.51%	124
Other	25.97%	47

## Conclusion

The Board's actions to date have ensured the ready availability of COVID-19 vaccines for residents throughout Pima County. This survey of unvaccinated county employees confirms that the only significant barrier to vaccination that remains are deeply held personal beliefs

The Honorable Chair and Members, Pima County Board of Supervisors  
Re: **Survey of Unvaccinated Employees**  
September 20, 2021  
Page 3

that are unlikely to be easily corrected. What is most concerning is that such beliefs are also affecting the delivery of vaccine to their children.

CHH/dym

Carmine DeBonis, Jr., Deputy County Administrator for Public Works  
Francisco García, MD, MPH, Deputy County Administrator & Chief Medical Officer,  
Health and Community Services  
Terry Cullen, MD, MS, Public Health Director, Health Department

## Q1 Have you received at least one dose of a COVID-19 vaccine?

Answered: 371 Skipped: 0

ANSWER CHOICES	RESPONSES	
Yes	36.39%	135
No	63.61%	236
TOTAL		371

## Q2 Did you receive (or do you plan to receive) all required doses?

Answered: 128 Skipped: 243

ANSWER CHOICES	RESPONSES	
Yes, received all required doses	60.16%	77
Yes, plan to receive all required doses	28.91%	37
No, don't plan to receive all required doses	10.94%	14
<b>TOTAL</b>		<b>128</b>

### Q3 Now that vaccines to prevent COVID-19 are available to most adults in the United States, will you...

Answered: 173 Skipped: 198

ANSWER CHOICES	RESPONSES
Definitely get a vaccine	1.16% 2
Probably get a vaccine	3.47% 6
Be unsure about getting a vaccine	13.29% 23
Probably NOT get a vaccine	24.86% 43
Definitely NOT get a vaccine	57.23% 99
<b>TOTAL</b>	<b>173</b>

### Q4 Which of the following, if any, are reasons that you have not been vaccinated? Select all that apply.

Answered: 181 Skipped: 190

## Pima County Employee Vaccination Survey

ANSWER CHOICES	RESPONSES	
I am concerned about possible side effects of a COVID-19 vaccine	74.59%	135
I don't know if a COVID-19 vaccine will protect me	33.15%	60
I don't believe I need a COVID-19 vaccine	43.09%	78
My doctor has not recommended it	25.41%	46
I plan to wait and see if it is safe and may get it later	36.46%	66
I am concerned about the cost of a COVID-19 vaccine	1.10%	2
I don't trust COVID-19 vaccines	47.51%	86
I don't trust the government	38.67%	70
I don't think COVID-19 is that big of a threat	25.97%	47
It's hard for me to get a COVID-19 vaccine	1.66%	3
I believe one dose is enough to protect me	1.66%	3
I experienced side effects from the dose of COVID-19 vaccine that I did receive	1.66%	3
I have already had COVID-19	27.07%	49
Other (please specify)	45.86%	83
Total Respondents: 181		

#	OTHER (PLEASE SPECIFY)	DATE
1	Previous medical issues, concern for something else happening	9/19/2021 3:25 PM
2	Severe/possibly fatal allergy to PEG (ingredient in the vaccine)	9/17/2021 10:10 AM
3	Personal decision - my choice	9/17/2021 7:37 AM
4	Historically, mandatory flu shots in the U.S. Air Force made me sick.	9/17/2021 7:28 AM
5	Censorship of dissident opinions has increased my suspicion.	9/16/2021 9:04 PM
6	I have concerns regarding the long-term effects of the available vaccines and the severe adverse side effects that they have been known to cause. The J&J vaccine was approved with documentation of blood clots in women under 50yrs. While the BioNTech vaccines have reported permanent nerve damage. Both adverse reactions have been reported in healthy individuals and are considered worth the cost. Previously the CDC stated that the rate of severe allergic reaction with the COVID vaccines are 10x higher than with the flu. I have previously had hives with other vaccines but never went in because it was just "normal" for me and with an available epi-pen nearby I had little concerns of reaction. With conflicting information from the scientific and medical fields, I'm not confident I would be reaction free.	9/16/2021 7:11 PM
7	Currently have heart issues, vaccine is known to cause myocardial	9/16/2021 12:56 PM
8	The fact sheets said do not get this vaccine if you have Blood issues or you are allergic to the ingredients. I am allergic to one of the ingredients and I have a blood issue.	9/16/2021 11:50 AM
9	I am concerned about the unknown long term effects of a newly developed/rushed vaccine. Vaccinated people are still getting Covid. Vaccinated people can still transmit covid. We are still being forced to wear masks even though the vaccine is supposed to protect against covid. So what's the point? I am healthier than the majority of the County employees. Why is Covid the only determining factor of health? Will the County mandate physical fitness tests as heart disease is the leading cause of death in the US? Will the County raise health insurance rates of people who participate in unsafe activities? Or only those who are unvaccinated? What is	9/16/2021 10:27 AM

## Pima County Employee Vaccination Survey

the data on natural immunity vs vaccinated people? It should be my choice what substance I want to put into my body that could have a life changing affect on me.

10	I'd rather trust my own immune system.	9/16/2021 6:41 AM
11	My body my choice	9/15/2021 4:56 PM
12	RELIGIOUS REASONS	9/15/2021 3:10 PM
13	I had a severe allergic reaction to the first dose. According to CDC guidelines, I should not receive any additional doses of the vaccine, regardless of who is the manufacturer.	9/15/2021 2:00 PM
14	Studies have shown that my blood type has a low probability of me getting Covid and if I do very little side effects	9/15/2021 12:04 PM
15	It's my right to choose	9/15/2021 10:10 AM
16	Ethical Concerns	9/15/2021 9:42 AM
17	<p>Since you asked. Possibly you will listen, but that is doubtful. Throughout this pandemic, especially after speaking to my doctor who told me under no terms should I take the vaccine, I did my own research. There have been alternatives, with proven history and application, that easily would have saved lives. When a nation, county, city as a whole refuse to ever consider or discuss a life saving alternative, that is called censorship. Censorship has nothing to do with politics, just power. There are numerous presentations of exactly why the mask, which cannot hold back a huge particle of drywall dust, certainly will not hold back a microscopic particle of covid. But these have been unacceptable topics of discussion. Censorship. I do not discuss anything in my workplace because I am sure I will be placed on a little list. And no, I am not paranoid. I am a realist. I have little faith in a governing body who flatly refused to acknowledge another perspective, perspectives that also have been fully researched by the "big names" such as Johns Hopkins and Harvard. The county has chosen what data they wish to support and there is no alternative. I have little faith in a governing body who believes bringing people into our county, untested for covid, not reviewed for any issues at all, and then spending my money to house and quarantine them- a little late I must say since the Super Spreader already occurred. My money which you plan to take from my healthy discounts to help pay for (and I am ridiculously healthy). And putting them up in RedRoof Inn, also at taxpayers expense. While our vets are kicked out of housing as prices skyrocket. And please do not go there- I have traveled my entire life, I love every culture, sorry, but no- I am not prejudice. I have no doubt I will leave my county job, which I am very good at and well respected for, if the county chooses to break the governor's law. So yes, I am much more well informed than most of your employees; I don't just believe anything I am told. I have very strong reasons for no vaccine but my reasons are not "appropriate" per Pima County. I watch all my healthy friends stay healthy, and watch compromised individuals, who definitely should be vaccinated and wear masks to protect themselves, but continue to fall ill. And I watch nurses and doctors who I know refuse the vaccine because they have seen exactly what it does, and doesn't do. You have spent almost no money on medical for me and yet I am punished for being healthy and being a "potential" covid case. IF I get covid, I guarantee I will be at home briefly (as the few my healthy friends who have gotten it have done). You are so pleased at the great numbers who are vaccinating. I promise you there are many who felt they had no choice, felt coerced, because they need their job. I am fortunate because I do not need this job, it just happens that I love it. And I will absolutely leave it.</p>	9/15/2021 9:18 AM
18	I had a health disease which the vaccine will interfere with	9/15/2021 9:01 AM
19	It is unconstitutional to require this vaccine; it is a personal choice. There are alternative treatments that are just as effective and are safer than an experimental vaccine. I choose not to be a guinea pig. Natural immunity is far superior than this novel vaccine. Most people will not get coronavirus-19 and most people do not die from it. I have not had the flu in over 20 years. If I were susceptible to COVID, I think I would have had it by now. Much data is unavailable, skewed and suppressed in order to wisely determine its need. It is not a leading cause of death, I have more of a chance of dying by getting hit by a bus. I actually have a higher chance of dying from adverse reaction to the experimental vaccine than dying from COVID-19 infection.	9/15/2021 8:51 AM
20	may have already had a SARS-CoV-2 infection	9/15/2021 7:13 AM
21	#2 says "prevent", my understanding is it doesn't prevent	9/15/2021 7:13 AM

## Pima County Employee Vaccination Survey

22	I believe it is our right to choose to be vaccinated and shouldn't be forced into it, nor punished for not wanting to get it, never in our history as Americans have we been forced to get a vaccine or our livelihood is threatened, it's unconstitutional, we as Americans should be able to make our own decisions without the government stepping in. Many of my friends who recieved the vaccine have got COVID again, now why would I get a shot that helps me get COVID once again lol	9/15/2021 6:38 AM
23	It is against the law to mandate the vaccine	9/15/2021 3:59 AM
24	It's a shot not a vaccine. Vaccines prevent and unfortunately this so called vaccine does not prevent COVID	9/15/2021 3:27 AM
25	I am unsure of the side effects..death, long lasting side effects, blood clots, uncontrollable tremors etc...	9/14/2021 10:01 PM
26	jahova witness	9/14/2021 6:16 PM
27	the vaccine could interfere with my own medications and my own antibodies. I am also being treated for skin cancer.	9/14/2021 5:12 PM
28	I don't agree with the testing process, we don't know enough about long term side effects , I'm vegan and don't take medication except natural and compounding pharmacy as a last resort, Believe in natural immunity, I don't have underlying issues that makes me think I would not recover if I got. I have a right to choose.	9/14/2021 5:07 PM
29	I am not against a vaccine of any kind. I am against any person or entity trying to force, coerce, etc anyone into doing anything to their person they are either not willing to or ready to do yet. So in that regard, it becomes a matter of principle.	9/14/2021 4:46 PM
30	Stop punishing our paychecks!! Governor was E-mailed.	9/14/2021 4:25 PM
31	There is not enough evidence showing long-term effectiveness and safety of the vaccine. The vaccine also does not prevent someone from spreading the virus, so individuals should be able to choose whether or not they want a vaccine based on their personal health and doctor recommendations.	9/14/2021 4:24 PM
32	Need more research and needs to be out longer than a year in my opinion and based off of other physicians I've spoken with.	9/14/2021 4:13 PM
33	I don't believe in taking a vaccine for a virus that has a 99.9% recovery rate with no treatment at all.	9/14/2021 3:40 PM
34	I don't get any other vaccines such as the flu, shingles etc. and stay healthy. I do not like to put things into my body such as vaccines if I can avoid them. I do not feel the COVID vaccine was tested long enough.	9/14/2021 3:36 PM
35	Why offer money if its a good idea?	9/14/2021 3:36 PM
36	History of experiments on people of color.	9/14/2021 3:32 PM
37	natural immunity is stronger than vaccination	9/14/2021 3:23 PM
38	My body my choice, for my age and health bracket chance of death from COVID is statistically 0	9/14/2021 3:21 PM
39	99.99% chance recovery without shot; safe meds available	9/14/2021 3:15 PM
40	I have severe medication allergies - fear of reaction	9/14/2021 3:12 PM
41	I have done extensive research on the adverse side effects, also I will NOT take a vaccine with possible aborted fetal cells due to my faith.	9/14/2021 3:09 PM
42	Religious Reasons	9/14/2021 3:06 PM
43	I have severe autoimmune issues	9/14/2021 2:56 PM
44	My religous belifes	9/14/2021 2:50 PM
45	Pregancy/Breastfeeding	9/14/2021 2:46 PM
46	I am against it for political, religious, and health-risks reasons.	9/14/2021 2:40 PM

## Pima County Employee Vaccination Survey

47	I have acknowledgement of people that died of Covid-19 even Vaccinated , I had bad experiences when also got the Flu Shot, I felt worse. Never got this shot again, it was worth it.	9/14/2021 2:38 PM
48	I am physically fit and eat healthy	9/14/2021 2:36 PM
49	Information about COVID has not been transparent from the beginning and has increasingly gotten worse over time. When honest and valid statistics are reported consistently without the government and media perpetrating fear, I will be able to make an informed decision on how to take care of my body.	9/14/2021 2:28 PM
50	I have had adverse reactions to vaccine's in the past. (Flu, Shingles and ETC.)	9/14/2021 2:27 PM
51	The vaccines have not been thoroughly tested and fully approved and there is no proven data to show that they are safe over the long term. There is far too many unknowns concerning the vaccines and COVID in general and far too many untruths purported as facts throughout this whole pandemic that I choose to make my own decisions on what i want to put in my body and my children's bodies. I have never had a flu shot and never had the flu. I have never spent a dollar of the County's money on medical costs. I am appalled that the County would penalize me financially when there are many life choices that burden the system.	9/14/2021 2:27 PM
52	99% survivability rate from virus, 10, 991 Deaths from vaccine as of August count, 1, 073 miscarriages, Typical Vaccine process takes 10-15 years this one was developed and approved in 19 months	9/14/2021 2:24 PM
53	I think that if you don't get the vaccine, you should be tested to see if you have the antibodies because just because you get the vaccine, it doesn't guarantee people I encounter can't get it.	9/14/2021 2:14 PM
54	I believe there are other reasons this vaccine is being pushed on the public and it's infringing on my constitutional rights. The vaccine hasn't been out there long enough to find out what the long term effects will be on people. Why is the government not worried about people coming here from other countries and getting vaccinated but pushing it on our own citizens. Something smells fishy about the whole thing.	9/14/2021 2:11 PM
55	weakened immune system related to other health problems	9/14/2021 2:10 PM
56	i have antibodies already	9/14/2021 2:09 PM
57	As per CDC and Anthony Fauci I don't fit the demographic for getting the vaccination.	9/14/2021 2:07 PM
58	Not willing to accept the mark of the beast.	9/14/2021 2:06 PM
59	worried about long term effects 3 years, 5 years, 10 etc.	9/14/2021 2:05 PM
60	I don't know if I already have antibodies for COVID-19.	9/14/2021 2:04 PM
61	Two people, my Mother-in-Law, and a friend at church each fell to the ground outdoors, in their yards, soon after taking the vaccine. Neither had a history of falling before the vaccine. My friend's continuing vertigo has officially been diagnosed as being a result of the vaccine.	9/14/2021 2:04 PM
62	I'm not fat, I'm not unhealthy, I'm the last year I've been shot at, ran into buildings with gunfire, almost been hit by several vehicles...thinks that will actually kill someone in my demographic. Not a illness that I've yet to test positive for or experience any symptoms for.	9/14/2021 2:03 PM
63	I was waiting for the FDA approval.	9/14/2021 1:58 PM
64	Breakthrough cases prove that current vaccines Do Not prevent COVID-19.	9/14/2021 1:58 PM
65	The public has been misled and lied too repeatedly from the start of this pandemic, especially from those who claim to be the leadership/science. The political desire to vaccinate the general population has turned into a cultish pursuit, which has turned draconian in practice. The harder you pusher the harder I will resist. Allow the individual to make their own decision about their health, just like the undocumented immigrants who are currently in Pima County.	9/14/2021 1:57 PM
66	My religion does not believe in taking a vaccines for viral	9/14/2021 1:55 PM
67	I don't want another stroke	9/14/2021 1:55 PM
68	My spouse worked at the health science library and her research shows the long term side-effects and carcinogenetic potential have not been studied yet. Approval of the vaccines without these studies is almost never done. These factors cause me to distrust the ethics for the CDC and FDA.	9/14/2021 1:53 PM

## Pima County Employee Vaccination Survey

69	I have cancer and am taking regular chemotherapy medication. My immune system has been compromised by radiation treatment near my lungs.	9/14/2021 1:51 PM
70	Unforeseen bodily damage. Long term damage.	9/14/2021 1:50 PM
71	It takes 5 years at least before FDA even considers approval. All of the sudden in a year its approved. I don't trust the government either.	9/14/2021 1:50 PM
72	I feel that if I were going to get COVID-19, I would have already gotten it.	9/14/2021 1:48 PM
73	I don't agree with the mandates to get a vaccine.	9/14/2021 1:48 PM
74	I have "COVID arm" from first dose	9/14/2021 1:47 PM
75	Allergic	9/14/2021 1:47 PM
76	Long term side effects from unknown and untried vaccine components	9/14/2021 1:46 PM
77	It does not protect you from getting covid, or from spreading it	9/14/2021 1:45 PM
78	I have sincerely held religious beliefs that prevent me from getting a covid vaccine. I am also pregnant and planning on breastfeeding and am afraid of adverse side effects being passed to my baby.	9/14/2021 1:44 PM
79	It is against my religious beliefs	9/14/2021 1:42 PM
80	Currently available vaccines use fetal cell lines in testing or production.	9/14/2021 1:42 PM
81	Had severe reaction to 1st dose, Dr. says no on the 2nd dose.	9/14/2021 1:42 PM
82	Segregation is not freedom. People are treated differently if they are or are not vaccinated.	9/14/2021 1:41 PM
83	You can't vaccinate for a virus.	9/14/2021 1:40 PM

### Q5 Have you experienced any of the following barriers to getting the COVID-19 vaccine? Please select all that apply.

We need truthful information from the professionals, not a one-sided opinion. See question 5 below, vaccines do not prevent COVID-19 and that is a fact.	9/14/2021 3:06 PM
25	I am not the least bit interested in having my God-given/constitutional rights to my own body violated.	9/14/2021 2:40 PM
26	The only barrier is having someone change the terms of my employment and try to force something into my body that I do not want.	9/14/2021 2:28 PM
27	None apply. Personal choice, my body, my choice.	9/14/2021 2:27 PM
28	The County is discriminating against me for refusing the vaccine. The Board of Supervisors negated the healthy lifestyle discount and implemented a surcharge for non-vaccinated employees. They are manipulating employees through financial hardship and increased healthcare.	9/14/2021 2:24 PM
29	see above	9/14/2021 2:19 PM
30	No barriers. I'm not a quinea pig to be tested on.	9/14/2021 2:11 PM
31	none of the above	9/14/2021 2:10 PM
32	N/A	9/14/2021 2:09 PM
33	My employer has mandated the COVID shot(s), which is a violation of my religious freedom with my body, the temple of the Holy Spirit. Now, I am more hesitant than ever to rush into thses shots. Also, the Johnson and Johnson shot is made using terminated human fetus' cells. This is also immoral, in my religion. .	9/14/2021 2:04 PM
34	N/A	9/14/2021 1:58 PM
35	I am not interested in the vaccine at this time so have made no efforts to get it	9/14/2021 1:56 PM
36	Not getting it	9/14/2021 1:55 PM
37	None	9/14/2021 1:53 PM
38	I have experienced no barriers to a vaccine	9/14/2021 1:51 PM
39	No Novavax available.	9/14/2021 1:50 PM
40	Government shady about everything to do with covid 19.	9/14/2021 1:50 PM
41	n/a	9/14/2021 1:49 PM
42	N/A	9/14/2021 1:47 PM
43	NA	9/14/2021 1:44 PM
44	no	9/14/2021 1:42 PM
45	No morally acceptable vaccines available.	9/14/2021 1:42 PM
46	I do not like to be coerced. Doesnt make me want the vaccine anymore than without incentives.	9/14/2021 1:41 PM
47	Not necessary	9/13/2021 11:41 AM

## Q6 Now that vaccines to prevent COVID-19 are available to most children between ages 12 and 17, will the parents or guardians of children ages 12-17 living in your household...

Answered: 181 Skipped: 190
