**DEFINITIONS:**

Land Stripping and/or Earthmoving	Land Stripping means removal of all or any portion of existing vegetation from parcels of land with equipment, which plows or scrapes the ground surface. Earthmoving means the movement of earthen material which causes or has the potential to cause fugitive dust.
Trenching	Trenching means the construction of a narrow excavation, in relation to its length, made below the surface of the ground for purposes of facilitating the installation and repair of underground utilities.
Road Construction	Road construction means the construction of a new roadway or the conversion of an existing unpaved road to a paved road.
Blasting	Blasting means the controlled use of explosives and other methods such as gas pressure blasting pyrotechnics, to break rock for excavation.
Multiple Activity Permit	May be obtained by persons conducting more than one dust producing activity to include, but not limited to, land stripping, earthmoving, trenching, blasting, and road construction at a single project site covering an acre or greater.
Demolition	Demolition means the wrecking or taking out of any load-supporting structural member of a facility together with any related handling operations or intentional burning of any facility.
Renovation	Renovation means altering a facility or one or more facility components in any way, including the stripping or removal of 'regulated asbestos containing material' (RACM) from a facility component. Operations in which load-supporting structural members are wrecked or taken out are demolitions.
