PIMA COUNTY AIR QUALITY CONTROL DISTRICT  
PERMIT CONDITION 0120

Degreasing, Dry Cleaning, and other operations using solvents or organic materials.

1. Emissions from solvent or organic materials operations must be minimized through the use of mechanical suppressants, wet scrubbing, carbon adsorption, incineration, or other equivalently effective controls.
2. Dry Cleaning equipment must be serviced and maintained so that no liquid solvent leaks from any portion of the equipment. Equipment openings (e.g., lint traps, button traps, access doors, etc.) must be kept closed except as required for proper operation and maintenance.
3. Permittee shall keep accurate records of all solvents or organic materials used and shall supply to the Control Officer, upon request, written evidence of the chemical composition, physical properties, and amounts consumed and recovered for each solvent or organic material.

PIMA COUNTY AIR QUALITY CONTROL DISTRICT  
PERMIT CONDITION 0090 - PAINT AND FIBERGLASS SPRAYING

1. Paint or fiberglass spraying must be conducted in such a manner as to prevent airborne particulates, droplets, aerosols, or odors from crossing the emission source's property lines.
2. Permittee shall not apply more than 5 gallons of coatings per day nor more than 1 gallon per hour unless such coatings have been previously approved for use by the control officer. No coatings shall be used that are baked or heat cured without prior approval of the control officer.
3. Enclosures are required except for the following types of operations: spot painting, architectural coating, and structural coating. Architectural coating is defined as a coating applied externally, commercially, or industrially to buildings and their appurtenances. Structural coating is defined as a coating applied externally, commercially, or industrially to structural steel, storage tanks, bridges, beams, girders, and other fabrications whose size is such that an enclosure is impractical.
4. The permittee shall keep accurate records of all solvents used in each permitted operation and shall supply to the Control Officer, upon request, written evidence of the chemical composition, physical properties, and the amount consumed and recovered for each organic solvent used.
