Re: FMSI Permit Renewal Correction Letter
Freeport-McMoRan Sierrita Inc., Permit # 6067

Dear Mr. Patel:

As stated in the Facility Change Allowed Without Permit Revision submitted to PDEQ on October 21, 2020, it was discovered that some information for Source ID 093 was inadvertently incorrect on the equipment list submitted in the renewal application. This letter serves as a correction letter to the permit renewal application submitted to PDEQ on July 29, 2020. The following information was discovered:

- The existing midsize stacking conveyor was not replaced in 2010 along with the rest of the equipment at the road rock crushing and screening plant, therefore, it should have a manufacture date of 1995.
- The equipment list in FMSI's Air Quality Permit #6067 states the width of the midsize stacking conveyor is 36 inches. The actual width of the midsize stacking conveyor is 30 inches.
- An undersize transfer conveyor is missing from the equipment list in FMSI's Air Quality Permit #6067 and the permit renewal application. The undersize transfer conveyor is located under the triple deck screen, as shown in the attached diagram.

The updated diagram and Permit Renewal Application equipment list are attached.

Please feel free to contact me at (520) 561-9714 should you require any additional information.

Regards,
