Re: Air Quality Permit Renewal (Permit # 2026)

Dear Mr. Kalmi:

The current air quality permit for the Asarco Mission Complex facility at 4201 W. Pima Mine Road, Sahuarita, Arizona, will be expiring on June 15, 2008. If you plan on continuing to operate the facility, you must apply for a permit renewal by completing the enclosed permit application package.

Title 17 of the Pima County Code (PCC) 17.12.160.D.2 specifies that a timely application is one that is submitted at least six months but not greater than 18 months prior to the date of permit expiration.

Please ensure you include the statement, "based upon information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete", in accordance with Pima County Code 17.12.160.I.

This letter is your written notice that an application for your facility is required. You will find the application forms you need to apply for your renewal air permit enclosed. If you have questions or need additional information about the application process, please call our Business Assistance Program representative at (520) 740-3340.

Please remember that you have until December 15, 2008 to complete the application and return it to us and be aware that if the application is received after this date, pursuant to PCC 17.12.280.B your right to operate your facility will terminate upon expiration of the permit. At that point your facility will be operating without a valid permit.

Sincerely,

A handwritten signature in black ink, appearing to read "Mukonde Chama", is written over a white rectangular area.

Mukonde Chama, PE
Air Permits Supervisor
