

Pima County Code Title 17 Reorganization

Sarah Reitmeyer Regulatory Program Manager

Overview

- * Air Quality Authority
- * Rulemaking Process
- * Review of Rulemaking Purpose
- * Overview of new format
- * Next steps
- * Questions

PDEQ Air Quality Authority

- County Statutory Authority for Air Quality Program
 - * Arizona Revised Statutes (A.R.S.) 49-402
 - * Arizona Revised Statutes (A.R.S.) 49-471 through 49-516
- * Adoptions by Reference
 - * Portions of the A.R.S.
 - * Portions of the U.S. Code of Federal Regulations (CFR)

PDEQ Air Quality Authority

* EPA Delegations

- * Prevention of Significant Deterioration (PSD)
- New Source Performance Standards (NSPS)
- National Emission Standards for Hazardous Air Pollutants (NESHAP)
- * Title V Program Approval (Operating Permits)

PDEQ Rulemaking Process

- * In House Drafting
- * Informal Stakeholder Meeting(s)
- * Notice of Formal Rulemaking in Arizona Administrative Register (AAR)
- * Public Notice in Newspapers & on Website (concurrent with AAR publication)

PDEQ Rulemaking Process

- * 30 Day Public Comment Period
- Formal Stakeholder Meeting(s)
- * Response to Comments Document
- Board of Supervisors (BOS) Hearing
- Notice of Final Rulemaking (after Rule is effective 31 days after BOS hearing)

Clean Air Act Requirements

- * Clean Air Act requires States to develop State Implementation Plans (called SIPS) to show how that State will attain and/or maintain the NAAQS
 - What is a SIP?
 - A SIP is a set of local rules (permitting and standards) that were developed to protect air quality and are federally enforceable

Clean Air Act Requirements

* Clean Air Act also requires a pre-construction review program for major and minor sources and an approvable operating permit program (Title V) for major sources

Background on PCC Title 17

- * Pima County Code (PCC) Title 17 is current location of air quality rules adopted by the Board of Supervisors (BOS)
- * First air quality ordinance adopted in 1966
- * A series of ordinances adopted through the 1970's to today address basic Clean Air Act requirements.

Background on PCC Title 17

- * In the early 1990's PCC Title 17 revised to create a unitary permit program as opposed to the traditional pre-construction (installation) and operating permit programs
 - The unitary program was created by ADEQ and Pima County adopted the program to conform to state regulations
- * Substantial changes have been made to PCC Title 17 since the early 1990's

Background on SIP

- * Pima County Rules were initially approved into the SIP in 1972 to meet requirements of the Clean Air Act
- * Pima County submitted revisions to the SIP in the late 1970's which were approved by EPA in 1980
- * 1994 Pima County submitted major revisions to SIP requesting to replace 1970 rules with the rules current at the time

Background on SIP

- * Pima County must revise the SIP to incorporate the current rules
- * Pima County must address issues with respect to preconstruction review in the new unitary permit scheme program and submit to EPA (through the State) for approval
 - ADEQ has worked with stakeholders and EPA to correct these issues
 - Pima County will mirror ADEQ's approach to make the current rules approvable

Review of Rulemaking Purpose

- * Prior to re-submitting the current Pima County Rules for inclusion in the SIP (or the Part 70, Title V Program) PDEQ would like to re-structure the air quality permitting rules
 - By re-organizing the PCC, PDEQ intends to simplify Title 17 to allow for simpler submittal of rules to EPA for approval

Permit Classes in PCC Title 17

- * Class I Major Sources
- * Class II Minor sources subject to federal NSPS (CAA Section 111) or federal NESHAP (CAA Section 112) standards
- * Class III Minor Sources subject to local standards only
- * Activity Permits Fugitive Dust & Asbestos
- * Open Burn Permits

Proposed Changes

OLD FORMAT

- * Chapter 17.12: Permits and Permit Revisions
 - One chapter covered all Permits and Classes of Permits

NEW FORMAT

- * Chapter 17.11: General Provisions
- Chapter 17.12: Class I Sources
- Chapter 17.13: Class II and III Sources
- * Chapter 17.14: Activity Permits

Chapter 17.11: General Provisions PIMA COUNTY ENVIRONMENTAL QUALITY

- * Classes of Permits
- * Material Permit Conditions
- * Permit Shield
- * Test Methods and Procedures
- * Synthetic Emission Limitations or Standards
- * Emission Monitoring
- * Performance Tests
- * And more...

Chapter 17.12: Class I Permits

- * Application Processing and Procedures
- Grant or Denial of Applications
- * Appeals of Permit Actions
- * Permit Contents
- Emission Cap
- * Permit Review by EPA

- * Acid Rain Provisions
- * Compliance plan Certification
- Permit Renewal, Revision or Transfer
- * Affirmative Defenses
- * Public Notification
- * Fees

Chapter 17.13: Class II & III Permits

- Permit ApplicationProcedures
- Grant or Denial of Applications
- * Appeals of Permit
- * Permit Contents
- Voluntary Termination of Permit
- * Emission Cap

- Permit Renewal, Revision or Transfer
- * Affirmative Defenses
- * Public Notification
- * Application for Coverage under a General Permit
- General PermitEnforcement
- * Fees

Chapter 17.14: Activity Permits

* General Provisions: Definition

- * Fugitive Dust
- * Asbestos NESHAP
- * Open Burning

Next Steps

- * Proposed rule published in AAR
- * Public notice in newspapers and online
- * Public Comment period begins
- * Formal stakeholder meeting

Next Steps

- * Public Comment period ends
- * BOS hearing for review and approval for inclusion in PCC Effective date is 31-days from date of adoption
- * Submit final rulemaking package to AAR
- * Final rule published in AAR
