

FEMA

June 4, 2019

Eric Shepp, P.E.
Floodplain Administrator
Pima County Regional Flood Control District
201 North Stone Avenue, 9th Floor
Tucson, Arizona 85701

Dear Mr. Shepp:

Thank you for your letter dated April 26, 2019, to the Department of Homeland Security, Federal Emergency Management Agency (FEMA), requesting that PC-HYDRO (Version 7.1) be approved for use in National Flood Insurance Program (NFIP) applications in Pima County. You enclosed with your letter a summary of the model and a memorandum from WEST Consultants, Inc. that describes the review of the model, relative documentation, and availability of the model for use by the Pima County Flood Control District.

FEMA agrees that the PC-HYDRO (Version 7.1) model meets the minimum requirements for use in NFIP applications in Pima County. The model will be added to FEMA's list of locally accepted hydrologic models.

Please note that this letter is used as the basis for updating FEMA's list of accepted models. Therefore, as we make updates to our list, please feel free to reference and include this letter in any NFIP mapping projects using this model.

If you need additional information or assistance, please contact Brian Koper of my staff in Washington, DC, either by telephone at (202) 646-3085 or by email at Brian.Koper@fema.dhs.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "P. Sacbibit".

Patrick F. Sacbibit, P.E., Branch Chief
Engineering Services Branch
Federal Insurance and Mitigation Administration

cc: Alison Kearns, Risk Analysis Branch Chief, Region IX
