

Conservation Effluent Pool User Application

Date:

Contact Information

Name of Operator:

Phone #:

Address:

Point of Contact:

Is this project a:

Describe the amount of perennial, intermittent, or ephemeral surface or subsurface water already available at the site of the proposed Riparian Project and the amount of water from those sources that the Operator plans to use to support the proposed project.

Describe whether the proposed Riparian Project requires Effluent or Reclaimed Water and the means by which that water resource will be measured and delivered to the project.

Describe the Operator's 10-year schedule for accepting Conservation Pool Effluent at the proposed Riparian Project.

Provide a general description of the proposed Riparian Project, specifying its location, goals, and the type of vegetation or wildlife the project will support. Include the location (pdf map requested) and CEP water demands of any Critical Vegetation or other habitat features as distinct from aquifer recharge or recreational uses of water.

What is the total quantity and annual amount (in acre feet) of Effluent requested to accomplish the Operator's goals in the developing and maintaining the proposed Riparian Project, including any anticipated change that will occur in Effluent demand.

Please describe the design and construction schedule the Operator will follow in developing the proposed Riparian Project.

Please describe the funding source(s) the Operator will use to develop and maintain the proposed Riparian Project.

For Administrative Use Only

Designated Project:	Yes	No	ESA Riparian Project:	Yes	No
