How to Dispose of Batteries

Trash: Alkaline batteries such as AA, AAA, 9v, C or D batteries are not hazardous and can safely be thrown in the trash.

Hazardous waste recycling only: Rechargeable batteries in laptops, tablets, digital cameras, cell phones and cordless power tools are usually lithium ion, nickel-cadmium, nickel metal hydride, nickel-zinc or small sealed lead batteries. Combine a rechargeable battery's toxic metals and lithium ion with hot temperatures and a fire can start! Never put a rechargeable battery in a Blue Barrel or trash – recycle them as hazardous waste at Batteries Plus, Home Depot, and other sites. Always check to see if facilities are open and if they are accepting rechargeable batteries.

Tip: Be safe! Remove batteries from cell phones and laptops before you give, throw away or recycle the device.

PIMA COUNTY WASTEWATER RECLAMATION

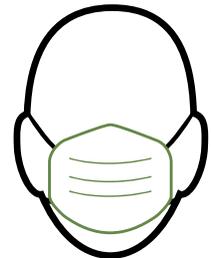

We are all in this together.

Keep it clean.
Wash your hands!

Be smart.
Stay 6 feet apart!

Stop the spread.
Wear a mask!
