The Preferred Pumper Program (PPP) is an alliance of grease interceptor pumping companies that have agreed to meet certain criteria and best management practices. Registered pumpers are certified to help you comply with the Pima County Industrial Wastewater Ordinance by doing the following:

- Perform cleaning procedures according to the PPP standards
- Dispose of waste in accordance with the federal, state, and local laws
- Restaurant will be in compliance with ordinance record keeping criteria
- With continuous performance evaluations of the pumpers, restaurants have assurance their grease interceptors are maintained properly

Benefits of Good Grease Interceptor Maintenance

The Pima County Industrial Wastewater Control requires every food service facility to have a grease interceptor to protect the public sewer. Good maintenance protects your investment in this required equipment and will:

- Prevent discharges of fats, oils and grease that can clog the sewer
- Extend the life of the grease interceptor
- Prevents sewer back-ups and overflows
- Ensures compliance with the local ordinances

PIMA COUNTY
WASTEWATER RECLAMATION
Registered Pumpers

Listed below are Preferred Pumper program members who have met County standards for quality of service.

New program members will be added once approved.

Learn more about the Preferred Pumper Program, including rules and regulations, and the most current listing of vendors at www.pima.gov/preferredpumper.
