PUBLIC SAFETY AND HOMELAND SECURITY BUREAU ANNOUNCES THAT 800 MHZ BAND RECONFIGURATION WILL COMMENCE FEBRUARY 1, 2007, IN THE NPSPAC REGIONS ASSIGNED TO WAVE 4 FOR NPSPAC CHANNELS

WT Docket No. 02-55

In July 2004, the Federal Communications Commission (Commission) adopted a Report and Order in this docket which, inter alia, reconfigured the 800 MHz band to eliminate interference to public safety and other land mobile communication systems operating in the band.\(^2\) As specified in the Report and Order, the band reconfiguration process is being overseen by a Transition Administrator (TA)\(^3\) which has provided the Commission with a plan detailing when band reconfiguration will commence in each of the fifty-five 800 MHz National Public Safety Planning Advisory Committee (NPSPAC) regions.\(^4\) On March 11, 2005, the Wireless Telecommunications Bureau approved the TA’s basic 800 MHz band reconfiguration schedule, i.e., the grouping of the NPSPAC regions into four waves (Waves 1-4) and starting the reconfiguration process in each wave on the dates recommended by the TA.\(^5\)

As part of the 800 MHz band reconfiguration process, the Commission stated that it would issue a Public Notice thirty days before reconfiguration is scheduled to start in each NPSPAC region.\(^6\) Each such Public Notice specifies a three-month voluntary negotiation period during which time identified licensees in the regions being reconfigured are encouraged to reach agreement with Nextel on the details of

\(^1\) Delegated authority for handling 800 MHz band reconfiguration issues has been transferred from the Wireless Telecommunications Bureau to the new Public Safety and Homeland Security Bureau. See Establishment of the Public Safety and Homeland Security Bureau, Order, FCC 06-35, released September 25, 2006.

\(^3\) Additional information on the TA can be found on its web page – www.800ta.org.

\(^4\) The TA’s band reconfiguration schedule may be viewed at www.800ta.org.

\(^5\) See Wireless Telecommunications Bureau Approves the Basic Reconfiguration Schedule Put Forth in the Transition Administrator’s 800 MHz Regional Prioritization Plan, Public Notice, DA 05-619, released March 11, 2005 (TA Plan PN).

\(^6\) See 47 C.F.R § 90.677(b) and Report and Order, 19 FCC Rcd 15076 ¶ 201. See also TA Plan PN at 2.
relocating. The voluntary negotiation period is followed by a three-month mandatory negotiation period, if necessary.8

By this Public Notice, we announce that the 800 MHz band reconfiguration process for NPSPAC channels will start February 1, 2007, in the NPSPAC regions assigned to Wave 4.9 A list of NPSPAC regions assigned to Wave 4 is attached to this Public Notice.10 The three-month period during which NPSPAC 800 MHz licensees have the option of negotiating on a voluntary basis will end April 30, 2007. The three-month mandatory negotiation period will end July 31, 2007.

We note that relocation channel assignments for some Wave 4 licensees may be dependent on the resolution of ongoing discussions between the U.S. Government and Mexico and Canada regarding allocation of channels in border areas. We expect Wave 4 licensees within the border areas to commence negotiations and planning to the extent that such activities are not dependent on receipt of relocation frequency assignments. To the extent that such licensees do not receive channel assignments from the TA within the negotiation or mediation period for this wave, they may submit a request for extension to the TA as needed, and the TA shall either act on the request or refer it to WTB as provided in the Commission’s orders in this proceeding.11 The TA may also propose adjustments to the Wave 4 schedule consistent with its authority under these orders, and we reserve the ability to make additional adjustments to the schedule to allow for resolution of international border issues if such adjustments will further the 800 MHz band reconfiguration process.

In the Report and Order, the Commission stated that it would freeze the filing of certain 800 MHz applications for the regions being reconfigured when it issued a Public Notice announcing the date when negotiation of relocation agreements must be concluded.12 The Commission explained that this freeze is necessary in order to maintain a stable spectral landscape during the reconfiguration process in each region.13 We also announce by this Public Notice that, effective immediately, we are freezing the filing of 800 MHz applications for NPSPAC channels in Wave 4. The freeze applies to stations located in all of the NPSPAC regions assigned to Wave 4 and to stations within seventy miles of the borders of the

7 See 47 C.F.R. § 90.677(b).
8 See 47 C.F.R. § 90.677(c).
9 For the purposes of this Public Notice, NPSPAC channels are those channels in the 821-824/866-869 MHz band.
10 See also TA Plan PN Appendix for NPSPAC regions in Wave 4.
11 See Improving Public Safety Communications in the 800 MHz Band, Order, FCC 06-63 (released May 8, 2006) (delegated authority to grant mediation extensions requested by the TA for a period not to exceed six months after the end of the mediation period); Improving Public Safety Communications in the 800 MHz Band, Order, FCC 06-76 (released May 26, 2006) (delegated authority to grant requests by the TA for extension of negotiation periods in future waves).
12 See Report and Order, 19 FCC Rcd 15078 ¶ 204.
13 See id. See also Supplemental Order, 19 FCC Rcd 25158-59 ¶ 87. The Wireless Telecommunications Bureau has provided additional information regarding the processing of 800 MHz applications during reconfiguration and indicated that there will be two separate application filing freezes for each region, one filing freeze for non-NPSPAC licensees and a separate freeze for NPSPAC licensees. See Wireless Telecommunications Bureau Outlines Application Freeze Process for Implementation of 800 MHz Band Reconfiguration, Public Notice, DA 05-1340, released May 11, 2005 (Two Freeze PN).
Wave 4 regions.\textsuperscript{14} This freeze is effective on the release date of this Public Notice and will last until thirty working days\textsuperscript{15} after the date for completion of mandatory negotiations as specified above, \textit{i.e.}, until September 12, 2007. The freeze does not apply to modification applications filed to implement 800 MHz band reconfiguration, applications involving administrative updates, assignments/transfers or renewal-only applications.\textsuperscript{16}

We reiterate that, to facilitate the 800 MHz reconfiguration process, the Commission has established the following new radio service codes for licenses that list 800 MHz band frequencies governed by Part 90 of the Commission’s Rules:

Site specific licenses:
- Public safety (conventional) – GE
- Public safety (trunked) – YE
- Business/Industrial/Land Transportation (conventional) – GJ
- Business/Industrial/Land Transportation (trunked) – YJ
- SMR (conventional) – GM and GL (The GL code is used only for applications listing both 800 MHz and 900 MHz frequencies)
- SMR (trunked) – YM and YL (The YL code is used only for applications listing both 800 MHz and 900 MHz frequencies)

Geographic area licenses:
- SMR, market area – YH and CY (The CY code is used only for applications listing both 800 MHz and 1.9 GHz frequencies)

The Commission’s Universal Licensing System (ULS) will automatically update modification applications filed to implement 800 MHz band reconfiguration to show the appropriate new radio service code (\textit{i.e.}, applicants should file using their current radio service codes). Once the radio service code has been changed on the license by the Commission, licensees filing subsequent applications concerning that license must use the new radio service code.

The Reconfiguration Plan filed by the TA is available on the Commission’s 800 MHz band reconfiguration web page at \url{http://www.800MHz.gov}. Questions concerning the plan, and other Transition Administrator matters, including whether your 800 MHz system must be relocated, should be directed to Brett Haan, BearingPoint, 1676 International Drive, McLean, VA 22102, \url{Brett.Haan@800ta.org}. For additional information on 800 MHz band reconfiguration issues, generally, please contact Roberto Mussenden, Esq., Public Safety and Homeland Security Bureau, at (202) 418-1428, TTY (202) 418-7233, or via e-mail to \url{Roberto.Mussenden@fcc.gov}.

Action by the Chief, Public Safety and Homeland Security Bureau.

\textsuperscript{14} Applicants may request an exception to the freeze pursuant to the waiver provisions in Section 1.925 of the Commission’s Rules, 47 C.F.R. § 1.925. Parties filing such a request should carefully review the rule’s criteria for a waiver and must provide complete support, including but not limited to documentation demonstrating that they meet each prong of the waiver standard. \textit{See Report and Order}, 19 FCC Red 15078 ¶ 204.

\textsuperscript{15} The computation of working days in this specific case does not include weekends or federal holidays.

\textsuperscript{16} \textit{See Report and Order}, 19 FCC Red 15078 ¶ 204.
